Healy Frequencies Without Cables!

Cable-free Harmonization of the Bioenergetic Field

A new type of coil, a new and unique Healy accessory: There may be times when you find using cable electrodes awkward or inconvenient. In these situations you can now use the Healy Coil that lets you transmit Healy frequencies without cables!

Practical and Innovative

Coils that are based on the principle of field-free waves have been widely used in recent years. They are also an ideal medium for cable-free transmission of Individualized Microcurrent Frequency (IMF) Healy programs into the Bioenergetic Field (BEF)!

The Healy Coil is a complement, rather than a substitute, for the cable electrodes: Cable electrodes are used both for influencing the Bioenergetic Field and for applying microcurrent to the physical body; whereas the Healy Coil can only be used for Healy IMF programs, NOT for microcurrent-based programs.

Note: This material is for European Union and Asia use only. The Healy Coil and Healy's Individualized Microcurrent Frequency (IMF) programs are not medical applications. They are not intended to cure, treat, mitigate, diagnose or prevent disease, have not been reviewed by a notified body and are not part of a conformity assessment procedure under the MDD/MDR.

Zero Field Frequencies (ZFF)

The genius inventor and physicist Nikola Tesla (known among other things for his invention of the AC or alternating current system) spent a large part of his creativity and time for experiments demonstrating that under perfect resonance, lossless wireless transmission of energy and information over long distances is possible. The American quantum physicist and philosopher David Bohm predicted such an effect in 1959 and it was experimentally proven not long after. This so called Aharonov-Bohm effect was designated as one of the Seven Wonders of the Quantum World by New Scientist magazine.

These field-free waves, which can also be referred to as "Zero Field Frequencies" (ZFF), originate from two opposing magnetic fields which cancel each other out, with the magnetic vector potential (Aharonov-Bohm effect) nevertheless remaining unchanged. ZFF can thus resonate with biological organisms without the transmission of physical energy.

■ ■ Magnetic fields ■ Vector potential

In this way, frequencies can be transmitted via field-free waves, without using cables. Pure information is vibrating.

In a similar manner (according to our opinion and hypothesis, without a verified direct connection to the research of Tesla and Bohm as described above), the Healy Coil was designed to exert field-free effects on the Bioenergetic Field.

Nikola Tesla, inventor and physicist

David Bohm, quantum physicist and philosopher
